# 2<sup>nd</sup> Year BIT Student Wanted

## Technical Consultant

bitPro is an IT consulting firm specialising in communication. The role of technical consultant at bitPro requires sound knowledge of first-year programming, which includes web design, and operations or information technology hardware, but preferably a mixture of all three. You will have some awareness of industry technical conventions as well as the ability to seek out information to fill any gaps in your own experience.

You will confer with your team coordinator and will be responsible for a range of tasks related to technical documentation, code clarification and IT best practice advice. You are expected to use your initiative and pursue work if you find yourself without work. You will need communications and teamwork skills as you may be required to provide technical assistance for your team and other parts of the organization, as well as outside clients.

Personal qualities, which will allow you to succeed in this role, include:
- Self-motivation
- Attention to detail
- Perseverance
- Problem solving ability
- Eagerness to help others
- Learn quickly

Useful skills to be built on with professional development:
- Follow instructions carefully
- Comprehend and apply a wide range of conventions
- Time management
- Research and apply new knowledge and skills
- Explain technical concepts to others
- Work closely with team and client

This is a technical role, which will require you to use your technical expertise together with communications skills to contribute to producing business outcomes.

Apply today by asking your Path of Study Advisor about Vocational Skills for IT.
